

# COVID Platform

Quickly and Easily Onboard and Support New Clients

Part of Gestalt's suite of COVID-19 Applications and Services solutions, the COVID Platform eliminates the heavy burden of patient accessioning, new client onboarding, and test result distribution.

## COVID Platform

This intuitive platform provides easy admin access for new customers such as employers, schools, municipalities and allows them to self-service for items such as custom reports, statistics, status updates, adding and deleting new individuals and much more.

We have partnered with Medical Network Solutions to provide a streamlined COVID-19 testing process, from supplies and data collection to lab integration and resulting. Labs are quickly and easily able to bring on new entities or launch their own direct to consumer testing operation without impacting their current administrative and support resources. You can add testing of a few people or hundreds of thousands.

## Supplies are Automatically Sent

Once a new client is onboarded, supplies are sent to to support the testing of each person in that organization. Inventory is automatically tracked and managed in the platform so that when their supply is low, new testing supplies are proactively sent.

## Clients Take the Testing Samples

The software walks your clients through the collection process and allows them to update symptom and exposure information.

### Easily Add Clients

Supplies

Samples

Send to Lab

Report Results Delivered in the  
Interfaced Platform

## Clients Ship Direct to You

Once the samples are collected, the client simply packs them up with the materials provided and uses the priority overnight shipping labels that are provided to send them direct to you - the lab.

## Automated Results are Sent Back

Through the direct integration and interfacing we provide, the results are sent back to the ordering organization in real-time.

## Benefits for the Lab

### Data Collection

The software enables your clients to securely and easily collect and manage key patient information for testing, insurance and reporting, eliminating the administrative overhead on the lab.

### Testing Walkthrough

The software walks your client's team through the collection process and enables them to enter symptom and exposure information, print labels and update contact info on the fly.

### Lab Integration

Simply click a button to indicate a sample has been collected and we send an advance digital order to the lab so they are ready for it once you ship.

### Online Results Portal

The portal receives the results directly from your LIS real-time and they are immediately available for your client. Once the results are in, a notification is sent to individuals with a link where they can securely view their results online.

### Billing

You, the laboratory, can handle the billing to insurance or, if the individual doesn't have insurance, they can get covered through the CARES Act.

## Admin Reporting

Allow your clients to self-serve and proactively keep track of their employees, students, organization's health by generating their own reports. They have the ability to run reports, in real-time, on everything from organization members to test results.

## Affordable Per Test Pricing

We know that COVID-19 testing costs can get expensive at scale. So, we work together with our partner to keep our prices extremely competitive. From the per test price, to the integration and onboarding of new clients.
